PROJECTS

School information System

This project is about a school information system where people can log in and access the content of the information System. This is a full stack web page. It is a responsive and dynamic webpage.

E commerce website

This Project redirects to you a home page of an e-commerce website where you can view product, order product, cancel ordered product etc. .

News Dose Web App

You can get daily news in this web app and this project is built using React js. This web app has a nice and interactive ui and it has different categories of news.

Portfolio

This is my portfolio. This web app is built using react. It uses a chat plugin for live chat.

Quizhub

This is a quiz giving website, where one user can create their account with their profile picture. And they can give quizzes on their interested subject. The app tracks the score, so that users can see their status. Users can search their friends on this platform and see their status.
